LOKA® + aws

Data Acceleration Partner Program (DAPP)

Come with an idea and leave with an architecture, implementation plan and expert advice for your biggest AWS data and ML questions. <u>100% funded by AWS</u>.

Your data is vital to driving differentiated customer experiences, but unlocking it is often easier said than done. **DAPP is designed by AWS to help startups reach their data and AI/ML goals** with support from **trusted partners like Loka.** We offer startups the substantial experience needed to build data infrastructure and strategy the right way from day one.

How it works

2-4 week program resulting in architecture recommendations for your data project.

**Phase I - Discover
(2-3 weeks)**

**Phase II - Design
(1-3 days)**

**Beyond DAPP
(Implement the Project)**

Loka will schedule a series of technical deep dive meetings to understand your architecture and use cases. We'll discuss design options and <u>offer guidance on the most effective and efficient data or AI/ML architecture.</u>

Loka will ideate and whiteboard precise data architecture designs to match your needs. You'll <u>leave with clear recommendations on the appropriate AWS services to use</u>, architecture and an implementation roadmap.

After receiving the recommendations, <u>you can opt to continue working with Loka to implement the proposal</u>, drawing on financial support from AWS funding programs such as Jumpstart.

Use cases

Unlock your data and expand your offering.
We can guide you through each phase of the data journey.

**Data Warehouses
& Data Lakes**

Before you can do anything meaningful with your data, you need to centralize and normalize it. Loka can help you choose the right data store and design pipelines to get your data into a conformed schema.

MLOps

Training a performant ML model is only the first part of the journey. 98% of ML projects still fail in production. Get the expert tooling and ongoing monitoring you need to run your ML model in production reliably and at scale.

Data Privacy & Compliance

Loka has significant experience setting up access control, data governance policies, backup and DR and more for a wide range of compliance standards including SOC2, HIPAA, HITRUST and FDA .

AI/ML

Building and training ML models requires specialized talent. Loka can help evaluate your data, select the right approach and design experiments to get your first AI/ML project running.
